

Poll Everywhere: Student Information

In this course, we will be using Poll Everywhere during class. This is a technology that facilitates interaction among students and instructors. During class, your instructor will display a Poll Everywhere activity on-screen and you can respond with your phone, tablet, or laptop. You do not need to create an account to use Poll Everywhere.

There are three options for responding to an activity:

1. Poll Everywhere mobile app

To download:

- [Poll Everywhere for iOS](#)
- [Poll Everywhere for Android](#)

Launch the app and enter the poll name provided by your instructor. When the instructor activates a question, you'll see it appear in the app and can respond.

After you have accessed a poll, it will be saved under "Recent presentations" for easier access. You can also see your Response history and, if you have an account, export your responses to email.

2. Web browser

On your laptop, phone, or tablet, use a web browser to go to <https://PollEv.com> and then enter the poll name provided by your instructor. When the instructor activates a question, you'll see it appear in the browser and can respond.

After you have accessed a poll, it will be saved under "Recent presentations" for easier access. You can also see your Response history and, if you have an account, export your responses to email.

3. Texting

When your instructor starts an activity, you will see instructions on their slide for responding via SMS text messaging. The instructions generally follow these steps:

1. Text the poll name to a certain number. You will then receive a text in response that confirms you have joined the poll.
2. Text your response. How you respond to the poll may differ by activity type.

Note that some types of activities do not allow participation via text message, so you will have to use the mobile app or a web browser to participate.
