

6 Ways to Engage Your Students in the

1) Encourage your students to attend events designed for them:

Dine & Dialogue with Engaged Citizens & Community Leaders
Discover & Dialogue *The Color of Medicine* Screening & Panel

Monday Feb. 18 6:00-8:30pm
Wednesday Feb. 20 6:00-8:30pm

<https://voices.wustl.edu/student-engagement-events/>

2) Invite your students to participate in community-wide events:

See the program for detailed information: <https://voices.wustl.edu/discovery-dialogue-2019/>

3) Bring your class to any session that aligns with your course goals!

Just RSVP for your class! <https://voices.wustl.edu/day-of-discovery-2019-registration/>

4) Offer your students opportunities to engage with the theme: *Dialogues Across Difference* through assignments.

- Encourage students to have a conversation with someone who holds a different perspective on a topic related to the course, and produce a short reflection from the experience.
- Ask students to attend a session or experience of their choosing throughout the event (or participate in activism or a service-oriented event on another day), and reflect on the topic as it relates to your course.
- Ask students to report an action they plan to take to “Make Change Happen” in the next month or year.

5) Plan a class day that engages your course topic with the theme: *Dialogues Across Difference*

- Incorporate a group discussion activity into your course where students share in conversations like those in the “WU in Focus” panel or other panels from the *Day of Discovery, Dialogue, & Action*.

6) Share the livestream or recordings in your lab, office, or classroom.

- If you and your students are unable to attend in person, engage your lab, office, or classroom using the livestream or recordings of the day. Visit <https://voices.wustl.edu/discovery-dialogue-2019/> for more information.

For more suggestions on how to engage your students in these activities or to make your classroom a space for Discovery, Dialogue and Action, contact [The Teaching Center](#).
